BEST PRACTICES

Best Practice-I

- **Title: Jayavantosov**

The Objectives of the Practice

- To inculcate sportsmanship spirit.
- To made available an opportunity to cultural activity in student.
- To acknowledge students with traditional games.
- To know the basic work of the founder member of the institution
- To develop the overall personality of the student.

The Context

- Today's declining sports awareness.
- Negligence of traditional games and culture.
- Very little attention toward Social and cooperative founders.

The Practice

- Sport department of our college has organized a sport week.
- Cultural department has organized various competitions like Elocution, Easy writing, Rangoli, greeting card, General knowledge and singing.
- Organization of traditional games- Mallakhamb & Rope gymnasium
- Organization of Mashal Rally.
- Organized an exhibitions of best memories behalf of 40th Anniversary of college.
- Organization of a programme of 'Precious memories of Hon Jayavantaraoji Bhosale' with contemporary social workers.

Evidence of success

- Above activity create a positive impact and socio-cultural awareness among the students.

- Students get experience thrill of sports for whole week.
- Students could understand a social work of Jayavantaraoji Bhosale.

Problems Encountered

- Lack of traditional play groups is observed.
- Very weak responses of the student are observed.

Resources Required

- For resource person transportation and properties more funding is required.

Best Practice-II

Title: Floristic Diversity Survey of Julewadi Village

The Objectives of the Practice

- To document floristic diversity of Julewadi village.

The Context

- In this era of rapid urbanization and environmental concern it is essential to document the floristic diversity by making preliminary survey of the region especially urban and rural areas.

The Practice

- A list of flowering plants has been made from the Julewadi village area.
- Faculty expert in Taxonomy from Post Graduate Center of Botany, research students working in the PG Center and Environment studies students have frequently visited the area and documented the floristic wealth.
- Every month about 4-5 visits have been made to study area.
- The specimens have been identified with the help of The Flora of the Presidency of Bombay; Flora of Maharashtra state Monocotyledons; Flora of Maharashtra state Dicotyledons-vol-I and II; Flora of Kolhapur District and Grasses of Maharashtra.
- The plant species have been photographed with Nikon 5200 camera.

Evidence of success

- The survey reveals that 70 families are represented by 225 genera comprising 289 species. Among them dicots are represented by 55 families with 153 genera and 191 species while monocots are represented by 15 families with 72 genera and 98 species.

- It creates awareness about biodiversity and need of its conservation among local peoples.
- Students participated in the survey were very much attracted towards knowing the biodiversity wealth and it also creates their interest for active participation in future activities.

Problems Encountered

- Due to lack of expertise in other fields of biodiversity, it is difficult to document biodiversity register.

Resources Required

- Needs experts in other fields of biodiversity to document biodiversity register scientifically.
